

Intelligent Finishes

Interform offers a wide selection of interior finishes to compliment your organization, space, budget and goals. Our interiors specialists assist you with needs/application evaluation, material selection, specification, procurement, installation and maintenance.

We maximize your investment by promoting products with proven performance. We can create a tailored combination of products and services to meet specific needs.

We offer products that improve overall health and optimize occupant performance by meeting the highest attributes and certification levels.

Examples of Green Solutions: Low VOC | Organic | FSC | SMART | California Platinum Standards | Green Guard Certified | Cradle to Cradle

Interior Finishes Services — *Thorough Process (continued)*

As commercial interior experts we help our customers meet their goals with the least amount of disruption, expense and hassle. Our services include product selection, procurement, installation, maintenance and document support (LEED, local government requirements, and internal requirements). We start with a compressive knowledge of the current trends and new products available for commercial interior use.

Evaluation

We meet with our customers to evaluate their particular application and space. We pay attention to:

- Light levels • Acoustical issues/needs • Traffic patterns • Maintenance programs • Environmental factors
- IAQ issues • Water and food use • Climate factors • Thermal Conditions • Space use • Flexibility requirements

Selection

Based on the evaluation and input from you, we assemble a host of product options to meet your specific needs. We work with hundreds of manufactures to provide thousands of product choices. We narrow the selections to an appropriate number to prevent an overly complex process. We provide product groups to create a package that works in unison. We provide you several options to view the products in use before making your final selection. We can view similar installations in your area so that you can see the products in practical use. We also offer CADs, simulations, floor plans and other visual tools to help you envision your finished space. With this information, you can select the products you prefer.

Specification

We then write the exact product specifications to ensure that you receive the products you have selected. If this project is going out to bid, you can be confident the bids you receive will reflect the products that will produce the end result you expect.

Procurement

We can assist you in the purchasing process. We maintain relationships with all our vendors to ensure that we can accurately forecast the installed price of your material selections. This helps to avoid the all too familiar “over-budget” challenges. We can also help you utilize any appropriate contract pricing that is available to you. These range from public contract (GSA, CMAS and others) to private buying groups (E&I, NJPA and others). We can also bundle your purchasing to include all interior finishes under one purchase. This limits any question of responsibility or communication.

Installation

We offer installation services for any commercial application. We can provide turn-key services (furnish and install) or simply furnish or install the material. We maintain a cohesive nationwide network of service providers for all interior products. This allows us to provide the same level of service for local projects and national projects. Our knowledgeable installers anticipate any challenges and take the appropriate steps to avoid missed deadlines and expectations. Our occupied office flooring replacement services offer an exceptional value. We can facilitate flooring replacement in your busy office with little disruption to your office and staff. Flooring replacement is completed after normal business hours with very little disruption to your office and staff. Our vast experience with furniture allows us to anticipate any issues avoid complications.

INTERIOR FINISHES

PART 2

Interior Finishes Services — *Thorough Process (continued)*

Maintenance

We understand the value of a product is determined in its practical use and longevity. This starts with providing material options that will perform over time, but extends to the proactive care of your investment. We offer an assortment of maintenance options to help you maximize your return on investment. We work with each of the manufacturers to provide the most suitable maintenance option that is extremely cost effective for the customer.

Reclamation

We also offer reclamation of unwanted interior finishes including carpet. We provide these services as thoughtful members of the community and in an effort to help our customers meet their goals and save money. Finding an appropriate end of life solution for interior finishes reduces the chances of incurring the landfill costs of disposal. We either reuse or recycle material and provide documentation to our customers. This documentation is essential for LEED or other requirements and helps customers demonstrate their corporate responsibly.

Interior Finishes Products — *Smart Options*

We offer products that enhance your space by providing durable, functional and aesthetic materials. We offer flooring, wall coverings and window coverings.

As a knowledge-based organization, we are always seeking new products and services that offer more value to our customers.

We challenge our vendors to offer the best products that offer exceptional value. These products must meet stringent standards for performance, environmental attributes and sustainability.
